

1. Mobile APP download

- In the mobile application store : domestic users search for " FFvideo " to download
Overseas users search for " FFvideo" to download
- Scan the QR code below to download the APP

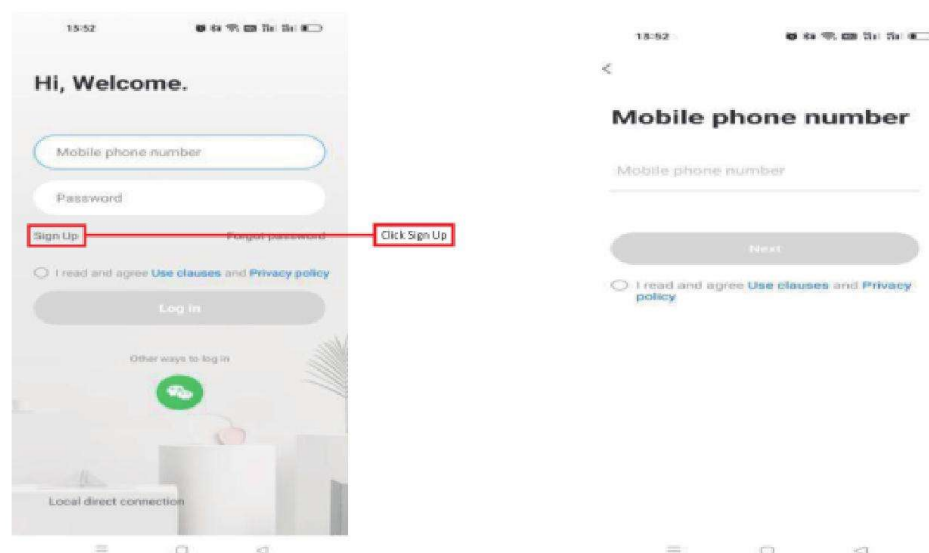

FFvideo

2. How to add camera

2.1 User Registration

User Registration

1. Open the FFvideo APP, click Sign up, then put the mobile number and click agree Privacy Policy, and click Next as following pictures.

2. After you get the verification code, then put the password to finish registration as the following pictures.

3. Add a smart camera

1. When you get this product, please make sure to connect with the standard power adaptor in the accessories, otherwise the device may not working properly. Before connecting, please make sure the mobile already connected the WI-FI @2.4GHz.
2. Open the FFvideo APP and click + on the right to add device and choose "Intelligence Camera" as the following picture.
